⁻Decrease.

TO THE STOCKHOLDERS:

A moderate upturn in the general economy after depressed conditions which deepened until after midyear, plus strict control of expenses, enabled us to meet adversities with a resilience which is indicative of your Company's strength.

In this report is a summary of operations in 1961 and statements of your Company's financial condition at the end of the year.

EARNINGS

After fixed charges normal net income amounted to \$79,524, or \$3.23 a share of common stock, compared to a net income of \$113,087, or \$4.59 a share in 1960. Operating income declined beyond any point in recent years but this was largely offset by reductions in operating expenses. Non-operating income remained at a satisfactory level. Some unusual expenditures for unprecedented flood damage and the retirement of a portion of a second main line track near Atlanta were charged directly to the retained income account as will be noted from explanations accompanying the balance sheet. The continuing high cost of mileage payments for private line cars adversely affected equipment rents. No income tax was payable because of tax credits brought forward from prior years.

DIVIDENDS

Stockholders received dividends of \$2 a share as of August 1, 1961, and \$2 a share as of December 20, 1961.

OPERATING REVENUE

There was a decrease of \$137,518, or 3.7%, in total operating revenues but it was possible to reduce normal operating expenses \$131,979, or 4.2%. The operating ratio improved 0.5%.

FREIGHT

Freight revenue decreased 2.6%. The number of tons handled increased 4.07% and the number of ton-miles increased 0.2%. This increase in volume was offset by a decrease of 2.75% in revenue per ton-mile. Road construction produced heavier movements of low-rated aggregates while the volume of more compensatory commodities was declining with the general economy. Aggregates accounted for slightly more than 21% of all tonnage in 1961.

Some interesting comparative statistics on commodities, tonnage and revenue appear on pages 15 and 16 of this report.

The introduction of piggyback services, the supply of specially designed equipment, continuous adapta-

tion of service to the needs of patrons, constant review and selective adjustment of rates, and close contact and helpful interest in developments and requirements of territories we serve are only some of the tools being regularly employed to meet new and competitive situations and increase the flow of traffic.

Aggressive, vigorous and alert sales efforts dedicated to taking full advantage of opportunities made possible by the generally expected expansion in the economy of our area, are continuing.

PASSENGER, ALLIED AND MISCELLANEOUS

Although passenger train performance improved somewhat during 1961 and there was an increase in special movements, revenue from passengers declined 5.5%, the number of passengers declined 0.46%, and the number of passenger-miles decreased 1.08%. Some of this decline is attributable to interruption of service on our line and connections due to flood conditions.

During 1959 we joined our connections in the introduction of a 30-day round trip ticket and a family plan ticket at reduced rates as incentives for increased rail travel. This experiment failed to yield anticipated results and has been discontinued.

It is noted that passengers account for slightly in excess of 40% of passenger train revenue.

Mail revenue increased 12.5% in 1961, about in line with the 13% increase in rates which became effective late in the year 1960.

During the year the Railway Express Agency, despite our vigorous opposition, installed highway trucks for handling express in local service between Atlanta and Montgomery. In the same period a new method of payment for express service became effective. The net result of these actions was a reduction of 20.2% in express revenue.

Miscellaneous revenue declined slightly in excess of 17% due largely to decrease in switching service requirements and demurrage charges.

OPERATING EXPENSES

In 1961 there were additional increases in wages and fringe benefits but by continued close control normal operating expenses were decreased 4.2% and remained in alignment with decreased revenues although there was a small increase in the units of freight transportation produced. The operating ratio was reduced from 84.87 in 1960 to 84.44 in 1961.

Further mechanization of track maintenance, plus availability of a large number of crossties from retirement of segment of second track, was a substantial factor in the control of expenses.

During the year abnormal items of expenditures

resulting from an unprecedented rainfall and floods and the removal of a section of second main line track, no longer justified by present train service, were incurred. Because of their unusual and non-recurring nature the Interstate Commerce Commission issued authority to charge these amounts to retained income in order to avoid serious distortions in operating expenses.

On May 1, 1961, agency and yard operations of Atlanta and West Point and Atlantic Coast Line at LaGrange, Ga., were consolidated to effect a more efficient and economical arrangement for both roads.

At the close of the year arrangements were in progress to consolidate in the Atlanta office train dispatching duties of Atlanta and West Point Railroad, The Western Railway of Alabama and Georgia Railroad.

On October 4, 1961, one of our freight trains suffered a serious derailment when it was struck at a grade crossing, just east of West Point, by a tractor-trailer type truck. Two diesel units and 33 freight cars were derailed. Damage to track, equipment and lading amounted to approximately \$300,000. No charges for this accident appear in current accounts as, in the opinion of counsel, responsibility lies with the trucking company and suit has been filed for recovery of damages.

RAILWAY TAX ACCRUALS

Railway tax accruals decreased \$18,218, or 8.28%.

Payroll taxes decreased because of less taxable employment. Sales and use tax declined because of lower material issues. There were also some reductions in property tax assessments.

As indicated in last year's report, no income tax was payable in 1961 because of credits brought forward from previous years. Additional credits from flood losses and unusual expenditures in 1961 will be carried forward into 1962 and it is now anticipated that no income tax will be payable for the current year.

EQUIPMENT RENTS

Balances in equipment rent accounts continued an adverse effect. As anticipated in the 1960 report, payments for mileage cars at the increased rates continued a large factor. The expected improvement in passenger car rents was achieved.

WAGE AND LABOR NEGOTIATIONS

As a result of national settlements a wage increase of two percent for operating employees became effective March 1, 1961, and non-operating employees received additional health and welfare benefits and life insurance coverage.

During November 1961 the presentation, before a Presidential Commission, of factual data in proposals of the railroads to change rules for operating employees to eliminate "feather bedding" was completed and, on February 28, 1962, the Commission made its report which, while not entirely acceptable to the railroads, will be supported by the industry. Negotiations with the craft unions commenced April 2 with a view of adopting the Commission's recommendations.

The end of the year found proposals from nonoperating employees for wage increases of 25 cents an hour and six months' advance notice before abolition or discontinuance of jobs, which were strongly opposed by management. This issue is now in the hands of another Presidential Commission appointed under the terms of the Railway Labor Act.

There was also pending before a national conference committee a proposal received in October, for an eight percent increase in wages of train dispatchers.

CAPITAL EXPENDITURES

From 1946 through 1961, inclusive, expenditures of new money for additions and betterments to road and equipment amounted to \$5,556,023, which is 74.13% of the total investment at the close of 1945. At the end of 1961 all debt for such purposes amounted to \$877,221.09, a reduction during the year of \$173,566.92.

Approximately 9 miles of second main line track east of Palmetto was retired. This will result in decreased maintenance costs in future years.

INDUSTRIAL DEVELOPMENT

Interest in industrial locations was increased in recent months and prospects continue to improve. Especially encouraging are the attractive possibilities in College Park and other portions of south Fulton County resulting from highway, street and utility improvements in the area.

During 1961 twelve new industries located at six points on your line and four plants are now under construction. The U. S. Rubber Company enlarged its facilities at Hogansville and the American Can Company — Marathon Division has just started work on doubling the size of its plant at Newnan.

Contacts are being maintained with all agencies concerned with industrial activities and full cooperation is extended to every prospect. The recent quickening of interest is encouraging and indications of further important growth are promising.

DIRECTORS

We are greatly pleased to announce the addition to your board of directors of Mr. J. Arch Avary, Jr., Executive Vice President, Trust Company of Georgia Associates, and Mr. John W. Dent, President, The Georgia Marble Company and affiliated companies, two outstanding and estimable business executives of wide interests.

GENERAL

Long sought legislation to relieve railroads of almost paralyzing artificial pressures from competitive inequalities was again deferred by Congress in 1961. They arise from a lack of opportunity succinctly expressed in the "Magna Carta" for transportation as the need for the following four freedoms:

Freedom from discriminatory regulation
Freedom from discriminatory taxation
Freedom from subsidized transportation
Freedom to provide a diversified transportation
service

No favors are asked — only an equality justly due. It will come only as a result of wide public interest properly expressed to legislative representatives. Your help and that of your friends is again urged!

The downward trend of business which created heavy pressures during 1960 continued its progress until the late months of 1961. Its effect on your Company was magnified by prolonged heavy rains and floods during late February which caused serious damage to your roadbed but, happily, the year terminated in a somewhat brighter atmosphere and the new year brought evidence of a more favorable business climate throughout the country.

Conditions, as they arise, are being met with diligent and constructive action to preserve and improve the excellent position of your company.

We again wish to express our grateful appreciation for the support of our stockholders and our patrons, and for the faithful and capable efforts of our officers and employees.

By order of the Board of Directors,

J. Clyde Mixon

President and General Manager

MILEAGE OPERATED

Miles of road operated at December 31, 1961:

MAIN LINE:

| MAIN LINE: | | |
|--|----------|-------|
| Atlanta to West Point | 72 | |
| Less—Leased to Atlanta Terminal Company | 10 85.62 | |
| Hulsey Junction to Oakland City | 5.16 | 90.78 |
| TRACKAGE RIGHTS: | | |
| Atlanta Terminal Company, Atlanta | 0.46 | |
| Central of Georgia Railway, Oakland Junction | 0.05 | |
| Georgia Railroad (Atlanta Joint Terminals) | 2.02 | 2.53 |
| Total mileage operated | | 93.31 |

Total mileage operated in freight and passenger service was 90.44 and 86.08 miles, respectively.

HASKINS & SELLS

ACCOUNTANTS

ATLANTA

ACCOUNTANTS' OPINION

Atlanta and West Point Rail Road Company:

We have examined the balance sheet of Atlanta and West Point Rail Road Company as of December 31, 1961 and the related statements of income and of retained income for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The Company is required to maintain its accounts in conformity with the Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission. As explained in Note 1, the provisions of such system vary in certain respects from generally accepted accounting principles.

In our opinion, with the exception referred to in the preceding paragraph, the accompanying statements present fairly the financial position of the Company at December 31, 1961 and the results of its operations for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

| Costs, less salvage, resulting from retiring a portion of second main track be Georgia and Palmetto, Georgia (Note 4) | | | 48,615.97 | |
| Damage to property occasioned by storm and flood (Note 4) | | | 69,612.11 | 216,772.08 |

NOTES TO FINANCIAL STATEMENTS

- 1. The provisions of the Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission vary from generally accepted accounting principles in that, under the Uniform System, no accounting recognition is given to the possible effect on income taxes in future years of prior years' reductions in income taxes resulting from the deductions for amortization and depreciation of property for income tax purposes in excess of the amounts recorded in the accounts. The cumulative amount of such reductions in income taxes included in retained income at December 31, 1961 was \$472,000. In 1961 the amortization was less than recorded depreciation, but this had no effect on income taxes because of a tax loss for the year; for 1960 income taxes were reduced \$10,000.
- The Company, together with Southern Railway Company and Central of Georgia Railway Company, jointly and severally guarantees unconditionally the payment of principal and interest of the first mortgage series A, 4% bonds of Atlanta Terminal Company due August 1, 1969, of which \$648,000 were outstanding at December 31, 1961.
- 3. On approval of Interstate Commerce Commission appropriated retained income, which represented old appropriations for capital expenditures, was returned to retained income as such segregation is no longer required.
- 4. On approval of Interstate Commerce Commission unusual costs and damage to property incurred in 1961 were charged to retained income to avoid distorting net income and impairing its significance.
